Challenges

- Enhancement in existing processes through automated mobile based solution.
- Low cost solution and support.
- Design of SCOR, a central database in reach of all its members/physicians.
- SCOR HIPAA compliance.
- SCOR search interface
- On demand reports for education and research.

Solution

- Web based OCR data processing.
- Automation of real-time PHI submission and posting into SCOR.
- Secure OCR form using mnemonics (HIPAA compliant).
- Dynamic form generation with pre-printed SCO- ID.
- Form submission facility from local center using fax
- Faxed forms reading and capturing PHI data.
- SCOR database building from PHI data
- A search interface to search SCOR records.
- Ad Hoc research Reports

Results

- Ease of PHI records exchange in secure way
- Facility of real time information exchange.
- Encouraged education and research
